Subject Index to Volume 15

Aerospace engineering, 587
Analytic criteria for seminormality, 467
Astrodynamics, 587
Axial vibration, 157

Banach spaces, 667

Calculus of variations, 37, 85, 145, 393, 533, 587, 615
Closed graph and convergence properties of operators, 467
Closure theorems, 441
Collapse mechanisms, 27
Column design, 69
Computing methods, 203, 223, 249, 503
Conjugate-gradient methods, 203, 223
Control theory, 327, 347, 393, 413, 517, 533
Convex programming, 249
Convexity, 393

Decomposition methods, 285, 533
Differential games, 509, 685
Discrete systems, 69
Distributed controls, 361
Distributed and boundary controls, 467
Drazin inverse, 503
Duality theory, 285
Dynamic programming, 13, 311

Education planning, 327
Eigenvalue problems, 69, 103
Elastic stability, 103
Engineering design, 85, 285
Epsilon technique, 685
Existence of optimal stochastic controls, 347
Existence theorems, 361, 413, 467

Feasible direction method, 131
Flight mechanics, 703
Frequency constraints, 157
Functional differential equations, 517
Function minimization, 189

Galerkin procedure, 103
Generalized control theory, 393, 703
Geometric programming, 189
Gradient methods, 203, 223
Gradient–restoration algorithms, 203, 223
Guaranteed cost, 509

Hyperbolic partial differential equations, 361

Integro partial-differential equations, 361
Isoperimetric problems, 103

Lagrange problems, 441, 467
Large displacements, 51
Large-scale systems, 533
Linear systems, 413, 503
Linearization methods, 249

CONTENTS

Vol. 15, No. 1 January 1975

Preface 3
Foreword: William Prager, *R. T. Shield* 5
A Dynamic Programming Approach to the Optimization of Elastic Trusses, *N. Distefano and A. Rath* 13
Overcomplete Mechanisms of Plastic Collapse, *J. Heyman* . . . 27
Minimum Weight Design of Elastic Cables, *N. C. Huang* . . . 37
Extremum Theorems for Large Displacement Analysis of Discrete Elastoplastic Structures with Piecewise Linear Yield Surfaces, *L. Corradi and G. Maier* 51
Optimal Placement of Available Sections in Structural Eigenvalue Problems, *E. F. Masur* 69
Optimal Design of Structures with Variable Support Conditions, *Z. Mróz and G. I. N. Rozvany* 85
The Shape of the Strongest Column with a Follower Load, *F. Odeh and I. Tadjbakhsh* 103
A General Criterion for Optimal Structural Design, *M. A. Save* . 119
Optimal Elastic Design of Trusses by Feasible Direction Methods, *C. Y. Sheu* 131
On the Prediction of Structural Layout for Maximum Stiffness, *J. E. Taylor* 145
Optimal Design in Axial Motion for Several Frequency Constraints, *W. H. Warner and D. J. Vavrick* 157

Vol. 15, No. 2 February 1975

On the Combination of the Multiplier Method of Hestenes and Powell with Newton's Method, *R. D. Rupp* 167
A Modified Concave Simplex Algorithm for Geometric Programming, *P. A. Beck and J. G. Ecker* 189
Sequential Conjugate-Gradient–Restoration Algorithm for Optimal Control Problems. Part 1. Theory, *J. C. Heideman and A. V. Levy* 203
Sequential Conjugate-Gradient–Restoration Algorithm for Optimal Control Problems. Part 2. Examples, *J. C. Heideman and A. V. Levy* 223
Book Notices 245
Research Reports 247

Vol. 15, No. 3 March 1975

A Geometric Computing Method for Nonlinear Optimal Regulator Problems with Singular Arcs, *P. L. Katz* 249
The Use of Hestenes' Method of Multipliers to Resolve Dual Gaps in Engineering System Optimization, *G. Stephanopoulos and A. W. Westerberg* 285
A Generalized Choice Problem, *W. T. Rasmussen* 311
Optimal Investments for Universal Primary Education, *J. M. Ritzen* 327
Book Notices 341
Research Reports 343

Vol. 15, No. 4 April 1975

Foreword 345
Existence Results for Optimal Stochastic Controls, *H. J. Kushner* 347
Existence Theorems for Optimization Problems Concerning Hyperbolic Partial Differential Equations, *M. B. Suryanarayana* 361
Existence Theorems for Usual and Approximate Solutions of Optimal Control Problems, *M. F. Bidaut* 393
Existence Theorems and Necessary Conditions for a General Formulation of the Minimum Effort Problem, *J. A. Burns* . . . 413
Closure Theorems Without Seminormality Conditions, *L. Cesari and M. B. Suryanarayana* 441
Geometric and Analytic Views in Existence Theorems for Optimal Control. II. Distributed and Boundary Controls, *L. Cesari* . . . 467
Statement on Policy and Manuscript Preparation
Editorial Policy 499
Preparation of Papers 500

Vol. 15, No. 5 May 1975

The Drazin Inverse and a Spectral Inequality of Marcus, Minc, and Moyls, *G. Poole and T. Boullion* 503
The Effect of Playability in Differential Games on the Relation Between Best Guaranteed Costs and Saddlepoint Values, *G. Leitmann and S. Rocklin* 509
Maximum Principles for Control Systems Described by Measure Functional Differential Equations, *M. H. Chang and P. T. Liu* . 517
Two-Level Dynamic Optimization Methods, *G. Grateloup and A. Titli* 533

Characterization of Local Solutions for a Class of Nonconvex Programs, *P. P. Bansal and S. E. Jacobsen* 549
An Algorithm for Optimizing Network Flow Capacity Under Economies of Scale, *P. P. Bansal and S. E. Jacobsen* 565
Optimal Impulsive Transfers Between Real Planetary Orbits, *J. P. Gravier, C. Marchal, and R. D. Culp* 587
Book Notices 605
Research Reports 607
Announcement 609
Statement on Policy and Manuscript Preparation
Editorial Policy 611
Preparation of Papers 612

Vol. 15, No. 6 June 1975

On Some Optimum Problems of Vibration Theory, *V. A. Troitskii* 615
Second-Order Tests in Optimization Theories, *C. Marchal* . . . 633
Optimality Conditions and Constraint Qualifications in Banach Space, *F. J. Gould and J. W. Tolle* 667
Application of the Epsilon Technique to a Realistic Optimal Pursuit–Evasion Problem, *L. W. Taylor, Jr.* 685
Selection of Optimal Parameters for Multipurpose Controllable Systems: General Formulation of the Problem and Solution Algorithms, *V. V. Tokarev* 703
Research Reports 723
Statement on Policy and Manuscript Preparation
Editorial Policy 725
Preparation of Papers 726
Subject Index to Volume 15 729
Author Index to Volume 15 731

JOURNAL OF OPTIMIZATION THEORY AND APPLICATIONS: Vol. 16, Nos. 5/6, 1975

Subject Index to Volume 16

Adaptive control, 135
Aeroelasticity, 355
Algorithms for optimal control, 303
Approximation methods, 245

Bang–bang control, 497, 559
Barriers, 339
Boolean algebra, 87
Boolean functions, 87
Bounded control problems, 277
Bounded-state problems, 339

Compactness theorems, 549
Computing methods, 165, 303, 429, 447
Conjugate directions, 67
Conjugate-direction methods, 25
Conjugate-gradient methods, 429, 447
Conjugate Gram–Schmidt algorithm, 67
Continuity of mathematical programs, 409
Control theory, 119, 303, 497, 539
Convergence of algorithms, 99
Convex programming, 207, 399
Convexity, 559

Decomposition methods, 399
Descent methods, 39
Differential equations, 303
Differential games, 147, 339
Directional differentiability, 147
Distributed parameter problems, 119
Duality, 99
Duality gap, 221
Duality theory, 207
Dynamic programming, 39

Economics, 549
Eigenfunction expansion, 327
Elastic stability, 355
Embedding theorems, 539
Estimation theory, 135, 165

CONTENTS

Vol. 16, Nos. 1/2 July 1975

An Improved Penalty Function Method for Solving Constrained Parameter Optimization Problems, *J. T. Betts* 1
A Feasible Conjugate-Direction Method to Solve Linearly Constrained Minimization Problems, *M. J. Best*. 25
Use of Dynamic Programming to Accelerate Convergence of Directional Optimization Algorithms, *W. C. Turner and P. M. Ghare* . 39
Iterative Determination of Parameters for an Exact Penalty Function, *J. K. Hartman* 49
CGS Algorithms for Unconstrained Minimization of Functions, *R. F. Dennemeyer and E. H. Mookini*. 67
An Algorithm for Minimizing Boolean Functions, *J. C. Wilson* . 87
Convergence and Duality for the Multiplier and Penalty Methods, *R. D. Rupp* 99
Approximate Solutions to Idealized Structural Dynamic Optimization Problems, *T. A. Weisshaar* 119
A New Approach to Optimum State Estimation in Optimum System Control, *G. Jumarie* 135
A Class of Linear Evasion Problems, *T. Matsumoto* 147
The Treatment of Bias in the Square-Root Information Filter/Smoother, *G. J. Bierman*. 165
Statement on Policy and Manuscript Preparation
Editorial Policy 179
Preparation of Papers 180

Vol. 16, Nos. 3/4 August 1975

On Functions Whose Local Minima Are Global, *I. Zang and M. Avriel* 183
Integer and Mixed-Integer Programming Models: General Properties, *R. R. Meyer* 191
A Duality Theorem for a Special Class of Programming Problems in Complex Space, *O. P. Jain and P. C. Saxena* 207
Optimally Distributed Products, *G. H. Lawden* 221
Solution of Nonlinear Two-Point Boundary-Value Problems Using Spline Functions, *H. R. Sirisena and K. S. Tan* 245

On the Nonlinear Regulator Problem, *A. Halme and R. P. Hämäläinen* 255
First-Order Strong Variation Algorithms for Optimal Control, *D. Q. Mayne and E. Polak* 277
First-Order Strong Variation Algorithms for Optimal Control Problems with Terminal Inequality Constraints, *E. Polak and D. Q. Mayne* 303
On Optimal Feedback Control of a Class of Linear Distributed Systems, *Y. P. Shih and C. K. Chu* 327
The Surveillance–Evasion Game of Degree, *J. Lewin and J. V. Breakwell* 339
Optimization of a Nonconservative Elastic System with Stability Constraint, *C. Sundararajan* 355
Statement on Policy and Manuscript Preparation
Editorial Policy 379
Preparation of Papers 380

Vol. 16, Nos. 5/6 September 1975

Properties of the Random Search in Global Optimization, *R. S. Anderssen and P. Bloomfield* 383
Decomposition of the Convex Simplex Method, *W. S. Hsia* . . 399
Stability Theorems for Infinitely Constrained Mathematical Programs, *H. J. Greenberg and W. P. Pierskalla* 409
A Direct Method for the General Solution of a System of Linear Equations, *H. Y. Huang* 429
A Class of Quadratically Convergent Algorithms for Constrained Function Minimization, *H. Y. Huang and A. K. Aggarwal* . . . 447
Optimal Input System Identification for Homogeneous and Nonhomogeneous Boundary Conditions, *R. E. Kalaba and K. Spingarn* 487
Time-Optimal Control of Multivariable Systems Near the Origin, *G. J. Olsder* 497
Min–Max Control of Systems Approximated by Simple Models: L_1-Type Cost Functionals, *M. Milanese and A. Negro* 519
An Embedding Theorem for Integral Equations, *V. L. Bakke* . . 539
The Fundamental Continuity Theory of Optimization on a Compact Space. I, *M. R. Sertel* 549
On a Generalization of a Theorem of Lyapunov, *G. F. Bryant* . 559
A Note on the Maximum of Quasiconcave Functions, *D. Netzer and U. Passy* 565
Errata Corrige: A Stable Approach to Newton's Method for General Mathematical Programming Problems in R^n, *R. A. Tapia* 571

CONTENTS

Vol. 17, Nos. 1/2 October 1975

Quadratic Control Problems, *M. R. Hestenes* 1
Second-Order Necessary Conditions for General Problems with State Inequality Constraints, *I. B. Russak* 43
A Controllability Minimum Principle, *W. J. Grantham and T. L. Vincent* 93
A Saddle-Point Criterion for Convex Problems with Infinite-Dimensional Equality Constraints, *M. S. Bazaraa and J. J. Goode* 115
Deterministic Optimal Maneuver Strategy for Multi-Target Missions, *N. P. Dwivedi* 133
A Method of Multipliers for Mathematical Programming Problems with Equality and Inequality Constraints, *S. B. Schuldt* 155
On Parameter Dependence of the Solution to an Extremal Problem, *A. D. Solomon* 163
A New Equation for the Linear Regulator Problem, *J. Casti* . . . 169
Two Remarks on the Gradient Method, *C. W. Groetsch* 177
On Programming with Absolute-Value Functions, *T. W. Hill, Jr., and A. Ravindran* 181
Statement on Policy and Manuscript Preparation
Editorial Policy 185
Preparation of Papers 186

Vol. 17, Nos. 3/4 November 1975

Sandwich Method for Finding Fixed Points, *H. W. Kuhn and J. G. MacKinnon* 189
On the Continuity of the Maximum in Parametric Linear Programming, *D. H. Martin* 205
A Generalized Lagrangian Function and Multiplier Method, *H. Nakayama, H. Sayama, and Y. Sawaragi* 211
Converse Duality in Banach Space, *B. D. Craven* 229
Stability, Prediction–Correction, and Dynamic Programming, *A. Lew* 239
World Dynamics: An Optimization Study of the Pollution Subsystem, *L. Mariani and B. Nicoletti* 251
On the Existence of Optimal Controls, *M. Vidyasagar* 273

Constrained Optimization Problems in Banach Space, *P. C. Das* 279
An Extension to Banach Space of Pontryagin's Maximum Principle, *A. Seierstad* 293
A Note on the Optimization of Constrained Design Problems, *G. Stephanopoulos* 337
Comment on a Note on Duality Gaps in Linear Programming over Convex Sets, *E. J. Balder* 343
Statement on Policy and Manuscript Preparation
Editorial Policy 347
Preparation of Papers 348

Vol. 17, Nos. 5/6 December 1975

Preface 351
Foreword: An Appreciation of Professor A. Busemann, *N. X. Vinh* 353
Recent Advances in Gradient Algorithms for Optimal Control Problems, *A. Miele* 361
Optimum Coasting Flight in a Horizontal Plane, *N. X. Vinh and C. J. Shieh* 431
Long-Range Energy-State Maneuvers for Minimum Time to Specified Terminal Conditions, *M. G. Parsons, A. E. Bryson, Jr., and W. C. Hoffman* 447
Minimum-Fuel Rocket Trajectories Involving Intermediate-Thrust Arcs, *J. V. Breakwell and J. F. Dixon* 465
Suboptimal Control Using a Second-Order Parameter-Optimization Method, *D. G. Hull and L. J. Edgeman* 481
Some Remarks About Two-Point Boundary-Value Problems and Invariant Embedding, *K. G. Guderley* 493
On a Class of Linear Differential Games, *S. Gutman and G. Leitmann* 511
Sufficiency Theorems for Target Capture, *D. J. Sticht, T. L. Vincent, and D. G. Schultz* 523
The Darboux Point, *P. M. Mereau and W. F. Powers* 545
Statement on Policy and Manuscript Preparation
Editorial Policy 561
Preparation of Papers 562
Subject Index to Volume 17 565
Author Index to Volume 17 567
